

McGill

Confidentiality Agreement

I understand that during my practical experiences (labs, meetings etc.), as part of my undergraduate/graduate studies in the Bioengineering/BBME program at the Faculty of Engineering, I may have access to personal and confidential information related to research conceptual design, data analysis and results.

As a condition of my training with the Department of Bioengineering, Faculty of Engineering, McGill University, I agree to and acknowledge the following:

1. I shall keep in strict confidence and agree not to inappropriately access, disclose, copy, remove, use, or give to any person or organization confidential information related to research conceptual design, data analysis and results.
2. I will only access, use, disclose, and transmit private and confidential information as required by my assigned duties during my practical experiences.
3. I understand that it is my responsibility to familiarize myself with the terms of the policies related to confidentiality on all of my experimental research.
4. I understand and agree that this Confidentiality Agreement will remain in force when I no longer have an association with The Department of Bioengineering.
5. I understand that should any breaches in confidentiality be found, I will be subject to corrective action and this could result in the termination of a laboratory placement /removal from the program as outlined in the Faculty of Engineering's Code of Conduct.
